#### 1. Main Features of EP-1

Cactus EP-1 battery pack is designed to power Cactus Wireless Flash RF60. With 8 AA batteries, it shortens the recycle time and supports more number of flashes per charge.

#### 2. Nomenclature

### 3. Caution & Warning

Before using the product, read the following instructions to ensure correct and safe use and to help prevent damage of the EP-1.

- This device contains high voltage components inside. Do not disassemble or repair it by yourself. Otherwise electric shock may occur.
- Turn OFF all your equipment (Cactus units, cameras, etc.) before changing batteries or making a connection.
- 3. Remove batteries during storage.
- Do not permanently store the product in a high temperature environment (i.e., under strong direct sunlight, near cooking stoves or oven).
- Do not operate the device in the presence of flammable gases or fumes.
- Keep out of reach of children.
- This device is not water resistant. Keep it away from rain, snow or humidity.
- Do not leave or use this device at a temperature of 45°C or above.
- To avoid overheating of the flash, do not fire more than 20 continuous flashes at full power. After 20 continuous flashes in short

intervals, allow a rest time of at least 10 minutes.

# 4. Major Specifications

- Power input: 8 AA LR6 alkaline or Ni-MH rechargeable batteries
- Flash recycle time at maximum power: approximately 2s (with fully charged Ni-MH rechargeable batteries)
- Dimensions: 173 x 71 x 28 mm
- Net Weight: 186g

## 5. Operation

- Install 8 AA batteries into the EP-1 battery pack, and 4 AA batteries into the flash.
- Insert the Flash Power Cable into the charging socket of the flash.
- Switch on the flash.
- Status Indicator turns green briefly as it charges the flash.
- Status Indicator then turns red when flash is fully charged.
- If Status Indicator does not light up, manually switch on the EP-1 Battery Pack by pressing the ON/OFF Button.
- Mount the EP-1 to the camera's tripod socket using the 1/4" Tripod Screw.
