Cactus

Press Release: Cactus X-TTL for Olympus and Panasonic is available now

#TTLwithoutBoundaries

Hong Kong, December 1, 2017 — The highly anticipated X-TTL firmware version for Micro Four Thirds camera systems — Olympus and Panasonic, is NOW available!

Besides retaining the revolutionary cross-brand abilities of remote power control and wireless HSS of Canon, Fujifilm, Nikon, Olympus, Panasonic and Pentax flashes simultaneously, the new system-specific X-TTL firmware adds cross-brand wireless TTL both on and off-camera.

Features at a glance

- 1. Cross-brand wireless manual power and zoom control with HSS/FP support of Canon, Fujifilm, Nikon, Olympus, Panasonic and Pentax flashes; 1
- 2. Cross-brand wireless TTL of Canon, Fujifilm, Nikon, Olympus and Panasonic flashes;²
- 3. Two Exposure Locks offer consistency with the convenience of wireless TTL;
- 4. Rear-curtain Sync is supported in both on and off-camera. 3
- 5. Works seamlessly with Cactus RF60X and RF60 to support remote HSS, TTL, as well as power and zoom control.

New Protocol and Upcoming Firmware Releases

Since the last release of Pentax X-TTL firmware, a new wireless protocol has been adopted.⁴ To work seamlessly with a Cactus RF60 and RF60X, be sure to also update to the latest firmware, version AO2 or later.

With the Olympus (M43) firmware now available, the remaining camera systems Nikon and Canon should be released during the first quarter of 2018 as scheduled. Stay up to date for the latest releases on X-TTL's microsite: https://www.cactus-image.com/special/X-TTL/

To download the latest firmware versions for each of the Cactus devices, get the latest Cactus Firmware Updater and you will be able to select the latest firmware versions.
